

BACKLOG BUDDY ? STUDY MATERIAL

Concrete Technology ? Syllabus & Reference Books

Subject Code: CE302 Semester: 3

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Cement and Aggregates

- Definition, key concepts and significance of Cement and Aggregates
- Important diagrams / derivations / algorithms for Cement and Aggregates
- Solved examples and previous-year questions on Cement and Aggregates

Unit 2: Concrete Mix Design

- Definition, key concepts and significance of Concrete Mix Design
- Important diagrams / derivations / algorithms for Concrete Mix Design
- Solved examples and previous-year questions on Concrete Mix Design

Unit 3: Fresh and Hardened Concrete

- Definition, key concepts and significance of Fresh and Hardened Concrete
- Important diagrams / derivations / algorithms for Fresh and Hardened Concrete
- Solved examples and previous-year questions on Fresh and Hardened Concrete

Unit 4: Special Concretes

- Definition, key concepts and significance of Special Concretes
- Important diagrams / derivations / algorithms for Special Concretes
- Solved examples and previous-year questions on Special Concretes

Unit 5: Quality Control and Testing

- Definition, key concepts and significance of Quality Control and Testing
- Important diagrams / derivations / algorithms for Quality Control and Testing
- Solved examples and previous-year questions on Quality Control and Testing

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
