REGULAR EXAMINATION ? 2024

Structural Analysis ? Regular Examination, 2024

Subject Code: CE303 Semester: 4 Regulation: R23

Time: 3 Hours Max. Marks: 70

.....
Note: This is a demo question paper generated for Backlog Buddy.

Answer all questions. Assume suitable data wherever necessary.
.....

SECTION A (Unit 1: Analysis of Determinate Structures)

1. Discuss the engineering applications of Analysis of Determinate Structures. [12 Marks]
2. Write short notes on Analysis of Determinate Structures. [12 Marks]
3. List the advantages and limitations of Analysis of Determinate Structures. Explain any two in detail. [12 Marks]

SECTION B (Unit 2: Analysis of Indeterminate Structures)

4. How is Analysis of Indeterminate Structures implemented? Give an algorithm / procedure and explain. [12 Marks]
5. Discuss the engineering applications of Analysis of Indeterminate Structures. [8 Marks]
6. Discuss the engineering applications of Analysis of Indeterminate Structures. [12 Marks]

SECTION C (Unit 3: Moment Distribution Method)

7. Write short notes on Moment Distribution Method. [8 Marks]
8. Derive the expression related to Moment Distribution Method and explain each term. [12 Marks]
9. Explain Moment Distribution Method with a neat diagram/sketch and a suitable example. [12 Marks]

SECTION D (Unit 4: Slope Deflection Method)

10. Define Slope Deflection Method. Explain its significance in Structural Analysis with a suitable example. [12 Marks]
11. Compare and contrast the key concepts involved in Slope Deflection Method. [8 Marks]
12. Derive the expression related to Slope Deflection Method and explain each term. [12 Marks]

SECTION E (Unit 5: Influence Lines)

13. Compare and contrast the key concepts involved in Influence Lines. [12 Marks]
14. Compare and contrast the key concepts involved in Influence Lines. [12 Marks]

15. How is Influence Lines implemented? Give an algorithm / procedure and explain. [12 Marks]
