

BACKLOG BUDDY ? STUDY MATERIAL

Structural Analysis ? Unit-wise Lecture Notes

Subject Code: CE303 Semester: 4

.....
Condensed notes covering all five units: Analysis of Determinate Structures, Analysis of Indeterminate Structures, Moment Distribution Method, Slope Deflection Method, Influence Lines.

Unit 1: Analysis of Determinate Structures

- Definition, key concepts and significance of Analysis of Determinate Structures
- Important diagrams / derivations / algorithms for Analysis of Determinate Structures
- Solved examples and previous-year questions on Analysis of Determinate Structures

Unit 2: Analysis of Indeterminate Structures

- Definition, key concepts and significance of Analysis of Indeterminate Structures
- Important diagrams / derivations / algorithms for Analysis of Indeterminate Structures
- Solved examples and previous-year questions on Analysis of Indeterminate Structures

Unit 3: Moment Distribution Method

- Definition, key concepts and significance of Moment Distribution Method
- Important diagrams / derivations / algorithms for Moment Distribution Method
- Solved examples and previous-year questions on Moment Distribution Method

Unit 4: Slope Deflection Method

- Definition, key concepts and significance of Slope Deflection Method
- Important diagrams / derivations / algorithms for Slope Deflection Method
- Solved examples and previous-year questions on Slope Deflection Method

Unit 5: Influence Lines

- Definition, key concepts and significance of Influence Lines
- Important diagrams / derivations / algorithms for Influence Lines
- Solved examples and previous-year questions on Influence Lines

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2?3 compulsory

problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
