

BACKLOG BUDDY ? STUDY MATERIAL

Design of Reinforced Concrete Structures ? Unit-wise Lecture Notes

Subject Code: CE402 Semester: 5

.....
Condensed notes covering all five units: Limit State Method, Flexure Design of Beams, Shear and Torsion Design, Slabs and Columns, Prestressed Concrete.

Unit 1: Limit State Method

- Definition, key concepts and significance of Limit State Method
- Important diagrams / derivations / algorithms for Limit State Method
- Solved examples and previous-year questions on Limit State Method

Unit 2: Flexure Design of Beams

- Definition, key concepts and significance of Flexure Design of Beams
- Important diagrams / derivations / algorithms for Flexure Design of Beams
- Solved examples and previous-year questions on Flexure Design of Beams

Unit 3: Shear and Torsion Design

- Definition, key concepts and significance of Shear and Torsion Design
- Important diagrams / derivations / algorithms for Shear and Torsion Design
- Solved examples and previous-year questions on Shear and Torsion Design

Unit 4: Slabs and Columns

- Definition, key concepts and significance of Slabs and Columns
- Important diagrams / derivations / algorithms for Slabs and Columns
- Solved examples and previous-year questions on Slabs and Columns

Unit 5: Prestressed Concrete

- Definition, key concepts and significance of Prestressed Concrete
- Important diagrams / derivations / algorithms for Prestressed Concrete
- Solved examples and previous-year questions on Prestressed Concrete

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
