

BACKLOG BUDDY ? STUDY MATERIAL

Design of Steel Structures ? Unit-wise Lecture Notes

Subject Code: CE501 Semester: 5

.....
Condensed notes covering all five units: Bolted and Welded Connections, Tension Members, Compression Members, Beams and Plate Girders, Plastic Design.

Unit 1: Bolted and Welded Connections

- Definition, key concepts and significance of Bolted and Welded Connections
- Important diagrams / derivations / algorithms for Bolted and Welded Connections
- Solved examples and previous-year questions on Bolted and Welded Connections

Unit 2: Tension Members

- Definition, key concepts and significance of Tension Members
- Important diagrams / derivations / algorithms for Tension Members
- Solved examples and previous-year questions on Tension Members

Unit 3: Compression Members

- Definition, key concepts and significance of Compression Members
- Important diagrams / derivations / algorithms for Compression Members
- Solved examples and previous-year questions on Compression Members

Unit 4: Beams and Plate Girders

- Definition, key concepts and significance of Beams and Plate Girders
- Important diagrams / derivations / algorithms for Beams and Plate Girders
- Solved examples and previous-year questions on Beams and Plate Girders

Unit 5: Plastic Design

- Definition, key concepts and significance of Plastic Design
- Important diagrams / derivations / algorithms for Plastic Design
- Solved examples and previous-year questions on Plastic Design

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
