

BACKLOG BUDDY ? STUDY MATERIAL

Environmental Engineering ? Syllabus & Reference Books

Subject Code: CE503 Semester: 5

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Water Demand and Quality

- Definition, key concepts and significance of Water Demand and Quality
- Important diagrams / derivations / algorithms for Water Demand and Quality
- Solved examples and previous-year questions on Water Demand and Quality

Unit 2: Water Treatment Processes

- Definition, key concepts and significance of Water Treatment Processes
- Important diagrams / derivations / algorithms for Water Treatment Processes
- Solved examples and previous-year questions on Water Treatment Processes

Unit 3: Sewage and Wastewater Treatment

- Definition, key concepts and significance of Sewage and Wastewater Treatment
- Important diagrams / derivations / algorithms for Sewage and Wastewater Treatment
- Solved examples and previous-year questions on Sewage and Wastewater Treatment

Unit 4: Air Pollution and Control

- Definition, key concepts and significance of Air Pollution and Control
- Important diagrams / derivations / algorithms for Air Pollution and Control
- Solved examples and previous-year questions on Air Pollution and Control

Unit 5: Solid Waste Management

- Definition, key concepts and significance of Solid Waste Management
- Important diagrams / derivations / algorithms for Solid Waste Management
- Solved examples and previous-year questions on Solid Waste Management

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
