

BACKLOG BUDDY ? STUDY MATERIAL

Estimation, Costing and Valuation ? Quick Revision & Formula Sheet

Subject Code: CE601 Semester: 6

.....
Last-day revision guide with key definitions, formulas and diagrams checklist.

Unit 1: Quantity Estimation

- Definition, key concepts and significance of Quantity Estimation
- Important diagrams / derivations / algorithms for Quantity Estimation
- Solved examples and previous-year questions on Quantity Estimation

Unit 2: Rate Analysis

- Definition, key concepts and significance of Rate Analysis
- Important diagrams / derivations / algorithms for Rate Analysis
- Solved examples and previous-year questions on Rate Analysis

Unit 3: Valuation of Properties

- Definition, key concepts and significance of Valuation of Properties
- Important diagrams / derivations / algorithms for Valuation of Properties
- Solved examples and previous-year questions on Valuation of Properties

Unit 4: Public Works Accounts

- Definition, key concepts and significance of Public Works Accounts
- Important diagrams / derivations / algorithms for Public Works Accounts
- Solved examples and previous-year questions on Public Works Accounts

Unit 5: Project Planning and Scheduling

- Definition, key concepts and significance of Project Planning and Scheduling
- Important diagrams / derivations / algorithms for Project Planning and Scheduling
- Solved examples and previous-year questions on Project Planning and Scheduling

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2?3 compulsory problems.
