

BACKLOG BUDDY ? STUDY MATERIAL

Earthquake Resistant Design of Structures ? Quick Revision & Formula Sheet

Subject Code: CE602 Semester: 7

.....
Last-day revision guide with key definitions, formulas and diagrams checklist.

Unit 1: Earthquake Basics and Seismology

- Definition, key concepts and significance of Earthquake Basics and Seismology
- Important diagrams / derivations / algorithms for Earthquake Basics and Seismology
- Solved examples and previous-year questions on Earthquake Basics and Seismology

Unit 2: Response Spectrum Analysis

- Definition, key concepts and significance of Response Spectrum Analysis
- Important diagrams / derivations / algorithms for Response Spectrum Analysis
- Solved examples and previous-year questions on Response Spectrum Analysis

Unit 3: Ductile Detailing of RC

- Definition, key concepts and significance of Ductile Detailing of RC
- Important diagrams / derivations / algorithms for Ductile Detailing of RC
- Solved examples and previous-year questions on Ductile Detailing of RC

Unit 4: Masonry Structures

- Definition, key concepts and significance of Masonry Structures
- Important diagrams / derivations / algorithms for Masonry Structures
- Solved examples and previous-year questions on Masonry Structures

Unit 5: Base Isolation and Control

- Definition, key concepts and significance of Base Isolation and Control
- Important diagrams / derivations / algorithms for Base Isolation and Control
- Solved examples and previous-year questions on Base Isolation and Control

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2?3 compulsory problems.
