

BACKLOG BUDDY ? STUDY MATERIAL

Engineering Chemistry ? Syllabus & Reference Books

Subject Code: CH103 Semester: 1

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Water Treatment

- Definition, key concepts and significance of Water Treatment
- Important diagrams / derivations / algorithms for Water Treatment
- Solved examples and previous-year questions on Water Treatment

Unit 2: Electrochemistry

- Definition, key concepts and significance of Electrochemistry
- Important diagrams / derivations / algorithms for Electrochemistry
- Solved examples and previous-year questions on Electrochemistry

Unit 3: Corrosion and its Control

- Definition, key concepts and significance of Corrosion and its Control
- Important diagrams / derivations / algorithms for Corrosion and its Control
- Solved examples and previous-year questions on Corrosion and its Control

Unit 4: Polymers

- Definition, key concepts and significance of Polymers
- Important diagrams / derivations / algorithms for Polymers
- Solved examples and previous-year questions on Polymers

Unit 5: Nanomaterials

- Definition, key concepts and significance of Nanomaterials
- Important diagrams / derivations / algorithms for Nanomaterials
- Solved examples and previous-year questions on Nanomaterials

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
