

BACKLOG BUDDY ? STUDY MATERIAL

Programming for Problem Solving in C ? Quick Revision & Formula Sheet

Subject Code: CS104 Semester: 1

.....
Last-day revision guide with key definitions, formulas and diagrams checklist.

Unit 1: Fundamentals of C

- Definition, key concepts and significance of Fundamentals of C
- Important diagrams / derivations / algorithms for Fundamentals of C
- Solved examples and previous-year questions on Fundamentals of C

Unit 2: Control Flow Statements

- Definition, key concepts and significance of Control Flow Statements
- Important diagrams / derivations / algorithms for Control Flow Statements
- Solved examples and previous-year questions on Control Flow Statements

Unit 3: Arrays and Strings

- Definition, key concepts and significance of Arrays and Strings
- Important diagrams / derivations / algorithms for Arrays and Strings
- Solved examples and previous-year questions on Arrays and Strings

Unit 4: Functions and Recursion

- Definition, key concepts and significance of Functions and Recursion
- Important diagrams / derivations / algorithms for Functions and Recursion
- Solved examples and previous-year questions on Functions and Recursion

Unit 5: Pointers and Structures

- Definition, key concepts and significance of Pointers and Structures
- Important diagrams / derivations / algorithms for Pointers and Structures
- Solved examples and previous-year questions on Pointers and Structures

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
