

BACKLOG BUDDY ? STUDY MATERIAL

Data Structures ? Syllabus & Reference Books

Subject Code: CS301 Semester: 3

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Arrays and Linked Lists

- Definition, key concepts and significance of Arrays and Linked Lists
- Important diagrams / derivations / algorithms for Arrays and Linked Lists
- Solved examples and previous-year questions on Arrays and Linked Lists

Unit 2: Stacks and Queues

- Definition, key concepts and significance of Stacks and Queues
- Important diagrams / derivations / algorithms for Stacks and Queues
- Solved examples and previous-year questions on Stacks and Queues

Unit 3: Trees and Binary Search Trees

- Definition, key concepts and significance of Trees and Binary Search Trees
- Important diagrams / derivations / algorithms for Trees and Binary Search Trees
- Solved examples and previous-year questions on Trees and Binary Search Trees

Unit 4: Graphs and Traversals

- Definition, key concepts and significance of Graphs and Traversals
- Important diagrams / derivations / algorithms for Graphs and Traversals
- Solved examples and previous-year questions on Graphs and Traversals

Unit 5: Hashing and Searching

- Definition, key concepts and significance of Hashing and Searching
- Important diagrams / derivations / algorithms for Hashing and Searching
- Solved examples and previous-year questions on Hashing and Searching

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
