

BACKLOG BUDDY ? STUDY MATERIAL

Digital Logic Design ? Syllabus & Reference Books

Subject Code: CS302 Semester: 3

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Number Systems and Codes

- Definition, key concepts and significance of Number Systems and Codes
- Important diagrams / derivations / algorithms for Number Systems and Codes
- Solved examples and previous-year questions on Number Systems and Codes

Unit 2: Boolean Algebra and K-Maps

- Definition, key concepts and significance of Boolean Algebra and K-Maps
- Important diagrams / derivations / algorithms for Boolean Algebra and K-Maps
- Solved examples and previous-year questions on Boolean Algebra and K-Maps

Unit 3: Combinational Circuits

- Definition, key concepts and significance of Combinational Circuits
- Important diagrams / derivations / algorithms for Combinational Circuits
- Solved examples and previous-year questions on Combinational Circuits

Unit 4: Sequential Circuits

- Definition, key concepts and significance of Sequential Circuits
- Important diagrams / derivations / algorithms for Sequential Circuits
- Solved examples and previous-year questions on Sequential Circuits

Unit 5: Memory and Programmable Logic

- Definition, key concepts and significance of Memory and Programmable Logic
- Important diagrams / derivations / algorithms for Memory and Programmable Logic
- Solved examples and previous-year questions on Memory and Programmable Logic

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
