

BACKLOG BUDDY ? STUDY MATERIAL

Discrete Mathematics ? Unit-wise Lecture Notes

Subject Code: CS305 Semester: 3

.....
Condensed notes covering all five units: Set Theory and Relations, Mathematical Logic, Graph Theory, Combinatorics, Algebraic Structures.

Unit 1: Set Theory and Relations

- Definition, key concepts and significance of Set Theory and Relations
- Important diagrams / derivations / algorithms for Set Theory and Relations
- Solved examples and previous-year questions on Set Theory and Relations

Unit 2: Mathematical Logic

- Definition, key concepts and significance of Mathematical Logic
- Important diagrams / derivations / algorithms for Mathematical Logic
- Solved examples and previous-year questions on Mathematical Logic

Unit 3: Graph Theory

- Definition, key concepts and significance of Graph Theory
- Important diagrams / derivations / algorithms for Graph Theory
- Solved examples and previous-year questions on Graph Theory

Unit 4: Combinatorics

- Definition, key concepts and significance of Combinatorics
- Important diagrams / derivations / algorithms for Combinatorics
- Solved examples and previous-year questions on Combinatorics

Unit 5: Algebraic Structures

- Definition, key concepts and significance of Algebraic Structures
- Important diagrams / derivations / algorithms for Algebraic Structures
- Solved examples and previous-year questions on Algebraic Structures

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2?3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
