REGULAR EXAMINATION ? 2024

Operating Systems ? Regular Examination, 2024

Subject Code: CS402 Semester: 4 Regulation: R20

Time: 3 Hours Max. Marks: 70

.....
Note: This is a demo question paper generated for Backlog Buddy.

Answer all questions. Assume suitable data wherever necessary.
.....

SECTION A (Unit 1: Process Management)

1. Explain process states and the Process Control Block (PCB) with a neat state transition diagram. [12 Marks]
2. Differentiate between process and thread. Explain multithreading models with examples. [12 Marks]
3. How is Process Management implemented? Give an algorithm / procedure and explain. [12 Marks]

SECTION B (Unit 2: CPU Scheduling)

4. Explain CPU scheduling algorithms ? FCFS, SJF, Round Robin and Priority ? with suitable examples and Gantt charts. [12 Marks]
5. Calculate the average waiting time and average turnaround time for the given set of processes using Round Robin scheduling (time quantum = 2). [12 Marks]
6. How is CPU Scheduling implemented? Give an algorithm / procedure and explain. [12 Marks]

SECTION C (Unit 3: Memory Management)

7. Explain paging and segmentation memory management techniques. Compare paging and segmentation. [12 Marks]
8. What is virtual memory? Explain the working of demand paging with necessary diagrams. [12 Marks]
9. Solve a problem related to Memory Management. Show all the steps clearly. [12 Marks]

SECTION D (Unit 4: File Systems)

10. Explain file system architecture, directory structure and allocation methods ? contiguous, linked and indexed. [12 Marks]
11. Define File Systems. Explain its significance in Operating Systems with a suitable example. [12 Marks]
12. Solve a problem related to File Systems. Show all the steps clearly. [12 Marks]

SECTION E (Unit 5: Deadlocks and Synchronization)

13. What is a deadlock? Explain the necessary conditions for deadlock and the methods

for handling it. [12 Marks]

14. Explain the Banker's algorithm for deadlock avoidance with an example. How is the safe state determined? [12 Marks]
15. Explain the producer?consumer problem and the readers?writers problem with semaphore solutions. [12 Marks]

*** End of Question Paper ***
