

BACKLOG BUDDY ? STUDY MATERIAL

Operating Systems ? Syllabus & Reference Books

Subject Code: CS402 Semester: 4

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Process Management

- Definition, key concepts and significance of Process Management
- Important diagrams / derivations / algorithms for Process Management
- Solved examples and previous-year questions on Process Management

Unit 2: CPU Scheduling

- Definition, key concepts and significance of CPU Scheduling
- Important diagrams / derivations / algorithms for CPU Scheduling
- Solved examples and previous-year questions on CPU Scheduling

Unit 3: Memory Management

- Definition, key concepts and significance of Memory Management
- Important diagrams / derivations / algorithms for Memory Management
- Solved examples and previous-year questions on Memory Management

Unit 4: File Systems

- Definition, key concepts and significance of File Systems
- Important diagrams / derivations / algorithms for File Systems
- Solved examples and previous-year questions on File Systems

Unit 5: Deadlocks and Synchronization

- Definition, key concepts and significance of Deadlocks and Synchronization
- Important diagrams / derivations / algorithms for Deadlocks and Synchronization
- Solved examples and previous-year questions on Deadlocks and Synchronization

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
