

BACKLOG BUDDY ? STUDY MATERIAL

Software Engineering ? Quick Revision & Formula Sheet

Subject Code: CS404 Semester: 4

.....
Last-day revision guide with key definitions, formulas and diagrams checklist.

Unit 1: Software Process Models

- Definition, key concepts and significance of Software Process Models
- Important diagrams / derivations / algorithms for Software Process Models
- Solved examples and previous-year questions on Software Process Models

Unit 2: Requirement Engineering

- Definition, key concepts and significance of Requirement Engineering
- Important diagrams / derivations / algorithms for Requirement Engineering
- Solved examples and previous-year questions on Requirement Engineering

Unit 3: Software Design and UML

- Definition, key concepts and significance of Software Design and UML
- Important diagrams / derivations / algorithms for Software Design and UML
- Solved examples and previous-year questions on Software Design and UML

Unit 4: Testing and Quality Assurance

- Definition, key concepts and significance of Testing and Quality Assurance
- Important diagrams / derivations / algorithms for Testing and Quality Assurance
- Solved examples and previous-year questions on Testing and Quality Assurance

Unit 5: Project Management

- Definition, key concepts and significance of Project Management
- Important diagrams / derivations / algorithms for Project Management
- Solved examples and previous-year questions on Project Management

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
