

BACKLOG BUDDY ? STUDY MATERIAL

Computer Networks ? Syllabus & Reference Books

Subject Code: CS501 Semester: 5

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Network Models and Physical Layer

- Definition, key concepts and significance of Network Models and Physical Layer
- Important diagrams / derivations / algorithms for Network Models and Physical Layer
- Solved examples and previous-year questions on Network Models and Physical Layer

Unit 2: Data Link Layer

- Definition, key concepts and significance of Data Link Layer
- Important diagrams / derivations / algorithms for Data Link Layer
- Solved examples and previous-year questions on Data Link Layer

Unit 3: Network Layer and Routing

- Definition, key concepts and significance of Network Layer and Routing
- Important diagrams / derivations / algorithms for Network Layer and Routing
- Solved examples and previous-year questions on Network Layer and Routing

Unit 4: Transport Layer

- Definition, key concepts and significance of Transport Layer
- Important diagrams / derivations / algorithms for Transport Layer
- Solved examples and previous-year questions on Transport Layer

Unit 5: Application Layer and Network Security

- Definition, key concepts and significance of Application Layer and Network Security
- Important diagrams / derivations / algorithms for Application Layer and Network Security
- Solved examples and previous-year questions on Application Layer and Network Security

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
