

BACKLOG BUDDY ? STUDY MATERIAL

Machine Learning ? Unit-wise Lecture Notes

Subject Code: CS502 Semester: 5

.....
Condensed notes covering all five units: Supervised Learning, Unsupervised Learning, Model Evaluation and Tuning, Ensemble Methods, Neural Network Basics.

Unit 1: Supervised Learning

- Definition, key concepts and significance of Supervised Learning
- Important diagrams / derivations / algorithms for Supervised Learning
- Solved examples and previous-year questions on Supervised Learning

Unit 2: Unsupervised Learning

- Definition, key concepts and significance of Unsupervised Learning
- Important diagrams / derivations / algorithms for Unsupervised Learning
- Solved examples and previous-year questions on Unsupervised Learning

Unit 3: Model Evaluation and Tuning

- Definition, key concepts and significance of Model Evaluation and Tuning
- Important diagrams / derivations / algorithms for Model Evaluation and Tuning
- Solved examples and previous-year questions on Model Evaluation and Tuning

Unit 4: Ensemble Methods

- Definition, key concepts and significance of Ensemble Methods
- Important diagrams / derivations / algorithms for Ensemble Methods
- Solved examples and previous-year questions on Ensemble Methods

Unit 5: Neural Network Basics

- Definition, key concepts and significance of Neural Network Basics
- Important diagrams / derivations / algorithms for Neural Network Basics
- Solved examples and previous-year questions on Neural Network Basics

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
