

BACKLOG BUDDY ? STUDY MATERIAL

Artificial Intelligence ? Unit-wise Lecture Notes

Subject Code: CS503 Semester: 5

.....
Condensed notes covering all five units: Uninformed and Informed Search, Knowledge Representation, Logic and Inference, Uncertainty and Bayesian Networks, Expert Systems and Applications.

Unit 1: Uninformed and Informed Search

- Definition, key concepts and significance of Uninformed and Informed Search
- Important diagrams / derivations / algorithms for Uninformed and Informed Search
- Solved examples and previous-year questions on Uninformed and Informed Search

Unit 2: Knowledge Representation

- Definition, key concepts and significance of Knowledge Representation
- Important diagrams / derivations / algorithms for Knowledge Representation
- Solved examples and previous-year questions on Knowledge Representation

Unit 3: Logic and Inference

- Definition, key concepts and significance of Logic and Inference
- Important diagrams / derivations / algorithms for Logic and Inference
- Solved examples and previous-year questions on Logic and Inference

Unit 4: Uncertainty and Bayesian Networks

- Definition, key concepts and significance of Uncertainty and Bayesian Networks
- Important diagrams / derivations / algorithms for Uncertainty and Bayesian Networks
- Solved examples and previous-year questions on Uncertainty and Bayesian Networks

Unit 5: Expert Systems and Applications

- Definition, key concepts and significance of Expert Systems and Applications
- Important diagrams / derivations / algorithms for Expert Systems and Applications
- Solved examples and previous-year questions on Expert Systems and Applications

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
