

BACKLOG BUDDY ? STUDY MATERIAL

Web Technologies ? Syllabus & Reference Books

Subject Code: CS601 Semester: 6

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: HTML5 and CSS3

- Definition, key concepts and significance of HTML5 and CSS3
- Important diagrams / derivations / algorithms for HTML5 and CSS3
- Solved examples and previous-year questions on HTML5 and CSS3

Unit 2: JavaScript and DOM

- Definition, key concepts and significance of JavaScript and DOM
- Important diagrams / derivations / algorithms for JavaScript and DOM
- Solved examples and previous-year questions on JavaScript and DOM

Unit 3: Client-Server Architecture

- Definition, key concepts and significance of Client-Server Architecture
- Important diagrams / derivations / algorithms for Client-Server Architecture
- Solved examples and previous-year questions on Client-Server Architecture

Unit 4: Server-Side Scripting

- Definition, key concepts and significance of Server-Side Scripting
- Important diagrams / derivations / algorithms for Server-Side Scripting
- Solved examples and previous-year questions on Server-Side Scripting

Unit 5: Web Services and Security

- Definition, key concepts and significance of Web Services and Security
- Important diagrams / derivations / algorithms for Web Services and Security
- Solved examples and previous-year questions on Web Services and Security

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2?3 compulsory problems.
