

BACKLOG BUDDY ? STUDY MATERIAL

Compiler Design ? Syllabus & Reference Books

Subject Code: CS602 Semester: 6

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Lexical Analysis

- Definition, key concepts and significance of Lexical Analysis
- Important diagrams / derivations / algorithms for Lexical Analysis
- Solved examples and previous-year questions on Lexical Analysis

Unit 2: Syntax Analysis

- Definition, key concepts and significance of Syntax Analysis
- Important diagrams / derivations / algorithms for Syntax Analysis
- Solved examples and previous-year questions on Syntax Analysis

Unit 3: Semantic Analysis

- Definition, key concepts and significance of Semantic Analysis
- Important diagrams / derivations / algorithms for Semantic Analysis
- Solved examples and previous-year questions on Semantic Analysis

Unit 4: Intermediate Code Generation

- Definition, key concepts and significance of Intermediate Code Generation
- Important diagrams / derivations / algorithms for Intermediate Code Generation
- Solved examples and previous-year questions on Intermediate Code Generation

Unit 5: Code Optimization and Runtime

- Definition, key concepts and significance of Code Optimization and Runtime
- Important diagrams / derivations / algorithms for Code Optimization and Runtime
- Solved examples and previous-year questions on Code Optimization and Runtime

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
