

BACKLOG BUDDY ? STUDY MATERIAL

Cryptography and Network Security ? Unit-wise Lecture Notes

Subject Code: CS603 Semester: 6

.....

Condensed notes covering all five units: Classical Encryption, Public Key Cryptography, Hash Functions and Message Authentication, Network Security Protocols, Digital Signatures and Certificates.

Unit 1: Classical Encryption

- Definition, key concepts and significance of Classical Encryption
- Important diagrams / derivations / algorithms for Classical Encryption
- Solved examples and previous-year questions on Classical Encryption

Unit 2: Public Key Cryptography

- Definition, key concepts and significance of Public Key Cryptography
- Important diagrams / derivations / algorithms for Public Key Cryptography
- Solved examples and previous-year questions on Public Key Cryptography

Unit 3: Hash Functions and Message Authentication

- Definition, key concepts and significance of Hash Functions and Message Authentication
- Important diagrams / derivations / algorithms for Hash Functions and Message Authentication
- Solved examples and previous-year questions on Hash Functions and Message Authentication

Unit 4: Network Security Protocols

- Definition, key concepts and significance of Network Security Protocols
- Important diagrams / derivations / algorithms for Network Security Protocols
- Solved examples and previous-year questions on Network Security Protocols

Unit 5: Digital Signatures and Certificates

- Definition, key concepts and significance of Digital Signatures and Certificates
- Important diagrams / derivations / algorithms for Digital Signatures and Certificates
- Solved examples and previous-year questions on Digital Signatures and Certificates

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based

on available papers (not guarantees).

- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2?3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
