

BACKLOG BUDDY ? STUDY MATERIAL

Cloud Computing ? Syllabus & Reference Books

Subject Code: CS604 Semester: 6

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Cloud Architecture and Service Models

- Definition, key concepts and significance of Cloud Architecture and Service Models
- Important diagrams / derivations / algorithms for Cloud Architecture and Service Models
- Solved examples and previous-year questions on Cloud Architecture and Service Models

Unit 2: Virtualization

- Definition, key concepts and significance of Virtualization
- Important diagrams / derivations / algorithms for Virtualization
- Solved examples and previous-year questions on Virtualization

Unit 3: Cloud Storage and Databases

- Definition, key concepts and significance of Cloud Storage and Databases
- Important diagrams / derivations / algorithms for Cloud Storage and Databases
- Solved examples and previous-year questions on Cloud Storage and Databases

Unit 4: Cloud Security

- Definition, key concepts and significance of Cloud Security
- Important diagrams / derivations / algorithms for Cloud Security
- Solved examples and previous-year questions on Cloud Security

Unit 5: Containers and Orchestration

- Definition, key concepts and significance of Containers and Orchestration
- Important diagrams / derivations / algorithms for Containers and Orchestration
- Solved examples and previous-year questions on Containers and Orchestration

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2?3 compulsory problems.
