

BACKLOG BUDDY ? STUDY MATERIAL

Internet of Things ? Syllabus & Reference Books

Subject Code: CS605 Semester: 6

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: IoT Architecture and Design

- Definition, key concepts and significance of IoT Architecture and Design
- Important diagrams / derivations / algorithms for IoT Architecture and Design
- Solved examples and previous-year questions on IoT Architecture and Design

Unit 2: Sensors and Actuators

- Definition, key concepts and significance of Sensors and Actuators
- Important diagrams / derivations / algorithms for Sensors and Actuators
- Solved examples and previous-year questions on Sensors and Actuators

Unit 3: IoT Communication Protocols

- Definition, key concepts and significance of IoT Communication Protocols
- Important diagrams / derivations / algorithms for IoT Communication Protocols
- Solved examples and previous-year questions on IoT Communication Protocols

Unit 4: IoT Platforms and Analytics

- Definition, key concepts and significance of IoT Platforms and Analytics
- Important diagrams / derivations / algorithms for IoT Platforms and Analytics
- Solved examples and previous-year questions on IoT Platforms and Analytics

Unit 5: IoT Security

- Definition, key concepts and significance of IoT Security
- Important diagrams / derivations / algorithms for IoT Security
- Solved examples and previous-year questions on IoT Security

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
