

BACKLOG BUDDY ? STUDY MATERIAL

Deep Learning ? Unit-wise Lecture Notes

Subject Code: CS702 Semester: 7

.....
Condensed notes covering all five units: Neural Network Foundations, Convolutional Neural Networks, Recurrent Neural Networks, Regularization and Optimization, Deep Learning Applications.

Unit 1: Neural Network Foundations

- Definition, key concepts and significance of Neural Network Foundations
- Important diagrams / derivations / algorithms for Neural Network Foundations
- Solved examples and previous-year questions on Neural Network Foundations

Unit 2: Convolutional Neural Networks

- Definition, key concepts and significance of Convolutional Neural Networks
- Important diagrams / derivations / algorithms for Convolutional Neural Networks
- Solved examples and previous-year questions on Convolutional Neural Networks

Unit 3: Recurrent Neural Networks

- Definition, key concepts and significance of Recurrent Neural Networks
- Important diagrams / derivations / algorithms for Recurrent Neural Networks
- Solved examples and previous-year questions on Recurrent Neural Networks

Unit 4: Regularization and Optimization

- Definition, key concepts and significance of Regularization and Optimization
- Important diagrams / derivations / algorithms for Regularization and Optimization
- Solved examples and previous-year questions on Regularization and Optimization

Unit 5: Deep Learning Applications

- Definition, key concepts and significance of Deep Learning Applications
- Important diagrams / derivations / algorithms for Deep Learning Applications
- Solved examples and previous-year questions on Deep Learning Applications

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
