

BACKLOG BUDDY ? STUDY MATERIAL

Natural Language Processing ? Syllabus & Reference Books

Subject Code: CS703 Semester: 7

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Text Preprocessing

- Definition, key concepts and significance of Text Preprocessing
- Important diagrams / derivations / algorithms for Text Preprocessing
- Solved examples and previous-year questions on Text Preprocessing

Unit 2: Language Models

- Definition, key concepts and significance of Language Models
- Important diagrams / derivations / algorithms for Language Models
- Solved examples and previous-year questions on Language Models

Unit 3: POS Tagging and Parsing

- Definition, key concepts and significance of POS Tagging and Parsing
- Important diagrams / derivations / algorithms for POS Tagging and Parsing
- Solved examples and previous-year questions on POS Tagging and Parsing

Unit 4: Word Embeddings

- Definition, key concepts and significance of Word Embeddings
- Important diagrams / derivations / algorithms for Word Embeddings
- Solved examples and previous-year questions on Word Embeddings

Unit 5: Machine Translation and Question Answering

- Definition, key concepts and significance of Machine Translation and Question Answering

- Important diagrams / derivations / algorithms for Machine Translation and Question Answering

- Solved examples and previous-year questions on Machine Translation and Question Answering

Exam Tips:

* Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.

* Solve at least 3 previous year papers under timed conditions before the exam.

* Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).

* Revise definitions, diagrams and standard derivations ? they earn easy marks.

* Practise numerical problems from every unit; papers usually include 2?3 compulsory

problems.
