

BACKLOG BUDDY ? STUDY MATERIAL

Probability and Statistics for Data Science ? Syllabus & Reference Books

Subject Code: DS301 Semester: 3

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Descriptive Statistics

- Definition, key concepts and significance of Descriptive Statistics
- Important diagrams / derivations / algorithms for Descriptive Statistics
- Solved examples and previous-year questions on Descriptive Statistics

Unit 2: Probability Distributions

- Definition, key concepts and significance of Probability Distributions
- Important diagrams / derivations / algorithms for Probability Distributions
- Solved examples and previous-year questions on Probability Distributions

Unit 3: Statistical Inference

- Definition, key concepts and significance of Statistical Inference
- Important diagrams / derivations / algorithms for Statistical Inference
- Solved examples and previous-year questions on Statistical Inference

Unit 4: Correlation and Regression

- Definition, key concepts and significance of Correlation and Regression
- Important diagrams / derivations / algorithms for Correlation and Regression
- Solved examples and previous-year questions on Correlation and Regression

Unit 5: Hypothesis Testing

- Definition, key concepts and significance of Hypothesis Testing
- Important diagrams / derivations / algorithms for Hypothesis Testing
- Solved examples and previous-year questions on Hypothesis Testing

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
