

BACKLOG BUDDY ? STUDY MATERIAL

Data Mining ? Syllabus & Reference Books

Subject Code: DS401 Semester: 4

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Data Preprocessing

- Definition, key concepts and significance of Data Preprocessing
- Important diagrams / derivations / algorithms for Data Preprocessing
- Solved examples and previous-year questions on Data Preprocessing

Unit 2: Association Rule Mining

- Definition, key concepts and significance of Association Rule Mining
- Important diagrams / derivations / algorithms for Association Rule Mining
- Solved examples and previous-year questions on Association Rule Mining

Unit 3: Classification Techniques

- Definition, key concepts and significance of Classification Techniques
- Important diagrams / derivations / algorithms for Classification Techniques
- Solved examples and previous-year questions on Classification Techniques

Unit 4: Clustering Techniques

- Definition, key concepts and significance of Clustering Techniques
- Important diagrams / derivations / algorithms for Clustering Techniques
- Solved examples and previous-year questions on Clustering Techniques

Unit 5: Outlier Detection

- Definition, key concepts and significance of Outlier Detection
- Important diagrams / derivations / algorithms for Outlier Detection
- Solved examples and previous-year questions on Outlier Detection

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
