

BACKLOG BUDDY ? STUDY MATERIAL

Exploratory Data Analysis ? Syllabus & Reference Books

Subject Code: DS501 Semester: 5

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Data Collection and Cleaning

- Definition, key concepts and significance of Data Collection and Cleaning
- Important diagrams / derivations / algorithms for Data Collection and Cleaning
- Solved examples and previous-year questions on Data Collection and Cleaning

Unit 2: Univariate and Bivariate Analysis

- Definition, key concepts and significance of Univariate and Bivariate Analysis
- Important diagrams / derivations / algorithms for Univariate and Bivariate Analysis
- Solved examples and previous-year questions on Univariate and Bivariate Analysis

Unit 3: Feature Engineering

- Definition, key concepts and significance of Feature Engineering
- Important diagrams / derivations / algorithms for Feature Engineering
- Solved examples and previous-year questions on Feature Engineering

Unit 4: Visualization for EDA

- Definition, key concepts and significance of Visualization for EDA
- Important diagrams / derivations / algorithms for Visualization for EDA
- Solved examples and previous-year questions on Visualization for EDA

Unit 5: Reporting Insights

- Definition, key concepts and significance of Reporting Insights
- Important diagrams / derivations / algorithms for Reporting Insights
- Solved examples and previous-year questions on Reporting Insights

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
