

BACKLOG BUDDY ? STUDY MATERIAL

Analog Electronic Circuits ? Syllabus & Reference Books

Subject Code: EC302 Semester: 3

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Diode Circuits

- Definition, key concepts and significance of Diode Circuits
- Important diagrams / derivations / algorithms for Diode Circuits
- Solved examples and previous-year questions on Diode Circuits

Unit 2: BJT Amplifiers

- Definition, key concepts and significance of BJT Amplifiers
- Important diagrams / derivations / algorithms for BJT Amplifiers
- Solved examples and previous-year questions on BJT Amplifiers

Unit 3: FET Amplifiers

- Definition, key concepts and significance of FET Amplifiers
- Important diagrams / derivations / algorithms for FET Amplifiers
- Solved examples and previous-year questions on FET Amplifiers

Unit 4: Feedback Amplifiers

- Definition, key concepts and significance of Feedback Amplifiers
- Important diagrams / derivations / algorithms for Feedback Amplifiers
- Solved examples and previous-year questions on Feedback Amplifiers

Unit 5: Oscillators

- Definition, key concepts and significance of Oscillators
- Important diagrams / derivations / algorithms for Oscillators
- Solved examples and previous-year questions on Oscillators

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
