

BACKLOG BUDDY ? STUDY MATERIAL

Network Analysis ? Syllabus & Reference Books

Subject Code: EC304 Semester: 3

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Mesh and Nodal Analysis

- Definition, key concepts and significance of Mesh and Nodal Analysis
- Important diagrams / derivations / algorithms for Mesh and Nodal Analysis
- Solved examples and previous-year questions on Mesh and Nodal Analysis

Unit 2: Network Theorems

- Definition, key concepts and significance of Network Theorems
- Important diagrams / derivations / algorithms for Network Theorems
- Solved examples and previous-year questions on Network Theorems

Unit 3: Two-Port Networks

- Definition, key concepts and significance of Two-Port Networks
- Important diagrams / derivations / algorithms for Two-Port Networks
- Solved examples and previous-year questions on Two-Port Networks

Unit 4: Resonance

- Definition, key concepts and significance of Resonance
- Important diagrams / derivations / algorithms for Resonance
- Solved examples and previous-year questions on Resonance

Unit 5: Transient Analysis

- Definition, key concepts and significance of Transient Analysis
- Important diagrams / derivations / algorithms for Transient Analysis
- Solved examples and previous-year questions on Transient Analysis

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2?3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
