

BACKLOG BUDDY ? STUDY MATERIAL

Microprocessors and Microcontrollers ? Syllabus & Reference Books

Subject Code: EC402 Semester: 4

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: 8086 Architecture

- Definition, key concepts and significance of 8086 Architecture
- Important diagrams / derivations / algorithms for 8086 Architecture
- Solved examples and previous-year questions on 8086 Architecture

Unit 2: Instruction Set and Assembly Programming

- Definition, key concepts and significance of Instruction Set and Assembly Programming
- Important diagrams / derivations / algorithms for Instruction Set and Assembly Programming
- Solved examples and previous-year questions on Instruction Set and Assembly Programming

Unit 3: Interrupts and Timers

- Definition, key concepts and significance of Interrupts and Timers
- Important diagrams / derivations / algorithms for Interrupts and Timers
- Solved examples and previous-year questions on Interrupts and Timers

Unit 4: Peripheral Interfacing

- Definition, key concepts and significance of Peripheral Interfacing
- Important diagrams / derivations / algorithms for Peripheral Interfacing
- Solved examples and previous-year questions on Peripheral Interfacing

Unit 5: Microcontroller Architecture

- Definition, key concepts and significance of Microcontroller Architecture
- Important diagrams / derivations / algorithms for Microcontroller Architecture
- Solved examples and previous-year questions on Microcontroller Architecture

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2?3 compulsory

problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
