

BACKLOG BUDDY ? STUDY MATERIAL

Control Systems ? Quick Revision & Formula Sheet

Subject Code: EC403 Semester: 4

.....
Last-day revision guide with key definitions, formulas and diagrams checklist.

Unit 1: Transfer Functions and Block Diagrams

- Definition, key concepts and significance of Transfer Functions and Block Diagrams
- Important diagrams / derivations / algorithms for Transfer Functions and Block

Diagrams

- Solved examples and previous-year questions on Transfer Functions and Block Diagrams

Unit 2: Time Response Analysis

- Definition, key concepts and significance of Time Response Analysis
- Important diagrams / derivations / algorithms for Time Response Analysis
- Solved examples and previous-year questions on Time Response Analysis

Unit 3: Root Locus Technique

- Definition, key concepts and significance of Root Locus Technique
- Important diagrams / derivations / algorithms for Root Locus Technique
- Solved examples and previous-year questions on Root Locus Technique

Unit 4: Frequency Response and Stability

- Definition, key concepts and significance of Frequency Response and Stability
- Important diagrams / derivations / algorithms for Frequency Response and Stability
- Solved examples and previous-year questions on Frequency Response and Stability

Unit 5: State Space Analysis

- Definition, key concepts and significance of State Space Analysis
- Important diagrams / derivations / algorithms for State Space Analysis
- Solved examples and previous-year questions on State Space Analysis

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
