

BACKLOG BUDDY ? STUDY MATERIAL

Digital Image Processing ? Syllabus & Reference Books

Subject Code: EC603 Semester: 6

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Image Transforms

- Definition, key concepts and significance of Image Transforms
- Important diagrams / derivations / algorithms for Image Transforms
- Solved examples and previous-year questions on Image Transforms

Unit 2: Image Enhancement

- Definition, key concepts and significance of Image Enhancement
- Important diagrams / derivations / algorithms for Image Enhancement
- Solved examples and previous-year questions on Image Enhancement

Unit 3: Image Restoration

- Definition, key concepts and significance of Image Restoration
- Important diagrams / derivations / algorithms for Image Restoration
- Solved examples and previous-year questions on Image Restoration

Unit 4: Image Segmentation

- Definition, key concepts and significance of Image Segmentation
- Important diagrams / derivations / algorithms for Image Segmentation
- Solved examples and previous-year questions on Image Segmentation

Unit 5: Image Compression

- Definition, key concepts and significance of Image Compression
- Important diagrams / derivations / algorithms for Image Compression
- Solved examples and previous-year questions on Image Compression

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
