

BACKLOG BUDDY ? STUDY MATERIAL

Electrical Machines-I ? Syllabus & Reference Books

Subject Code: EE301 Semester: 3

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Magnetic Circuits

- Definition, key concepts and significance of Magnetic Circuits
- Important diagrams / derivations / algorithms for Magnetic Circuits
- Solved examples and previous-year questions on Magnetic Circuits

Unit 2: Transformers

- Definition, key concepts and significance of Transformers
- Important diagrams / derivations / algorithms for Transformers
- Solved examples and previous-year questions on Transformers

Unit 3: DC Generators

- Definition, key concepts and significance of DC Generators
- Important diagrams / derivations / algorithms for DC Generators
- Solved examples and previous-year questions on DC Generators

Unit 4: DC Motors

- Definition, key concepts and significance of DC Motors
- Important diagrams / derivations / algorithms for DC Motors
- Solved examples and previous-year questions on DC Motors

Unit 5: Testing of DC Machines

- Definition, key concepts and significance of Testing of DC Machines
- Important diagrams / derivations / algorithms for Testing of DC Machines
- Solved examples and previous-year questions on Testing of DC Machines

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.
