

BACKLOG BUDDY ? STUDY MATERIAL

Power Systems-I ? Syllabus & Reference Books

Subject Code: EE302 Semester: 4

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Transmission Line Parameters

- Definition, key concepts and significance of Transmission Line Parameters
- Important diagrams / derivations / algorithms for Transmission Line Parameters
- Solved examples and previous-year questions on Transmission Line Parameters

Unit 2: Transmission Line Performance

- Definition, key concepts and significance of Transmission Line Performance
- Important diagrams / derivations / algorithms for Transmission Line Performance
- Solved examples and previous-year questions on Transmission Line Performance

Unit 3: Underground Cables

- Definition, key concepts and significance of Underground Cables
- Important diagrams / derivations / algorithms for Underground Cables
- Solved examples and previous-year questions on Underground Cables

Unit 4: Distribution Systems

- Definition, key concepts and significance of Distribution Systems
- Important diagrams / derivations / algorithms for Distribution Systems
- Solved examples and previous-year questions on Distribution Systems

Unit 5: Power System Protection

- Definition, key concepts and significance of Power System Protection
- Important diagrams / derivations / algorithms for Power System Protection
- Solved examples and previous-year questions on Power System Protection

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.
