

BACKLOG BUDDY ? STUDY MATERIAL

Power Systems-II ? Syllabus & Reference Books

Subject Code: EE501 Semester: 5

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Fault Analysis

- Definition, key concepts and significance of Fault Analysis
- Important diagrams / derivations / algorithms for Fault Analysis
- Solved examples and previous-year questions on Fault Analysis

Unit 2: Power System Stability

- Definition, key concepts and significance of Power System Stability
- Important diagrams / derivations / algorithms for Power System Stability
- Solved examples and previous-year questions on Power System Stability

Unit 3: Economic Load Dispatch

- Definition, key concepts and significance of Economic Load Dispatch
- Important diagrams / derivations / algorithms for Economic Load Dispatch
- Solved examples and previous-year questions on Economic Load Dispatch

Unit 4: HVDC and FACTS

- Definition, key concepts and significance of HVDC and FACTS
- Important diagrams / derivations / algorithms for HVDC and FACTS
- Solved examples and previous-year questions on HVDC and FACTS

Unit 5: Power System Transients

- Definition, key concepts and significance of Power System Transients
- Important diagrams / derivations / algorithms for Power System Transients
- Solved examples and previous-year questions on Power System Transients

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
