

BACKLOG BUDDY ? STUDY MATERIAL

Engineering Graphics and Design ? Unit-wise Lecture Notes

Subject Code: ME104 Semester: 1

.....
Condensed notes covering all five units: Orthographic Projections, Isometric Views, Sectional Views, Computer Aided Drafting, Assembly Drawings.

Unit 1: Orthographic Projections

- Definition, key concepts and significance of Orthographic Projections
- Important diagrams / derivations / algorithms for Orthographic Projections
- Solved examples and previous-year questions on Orthographic Projections

Unit 2: Isometric Views

- Definition, key concepts and significance of Isometric Views
- Important diagrams / derivations / algorithms for Isometric Views
- Solved examples and previous-year questions on Isometric Views

Unit 3: Sectional Views

- Definition, key concepts and significance of Sectional Views
- Important diagrams / derivations / algorithms for Sectional Views
- Solved examples and previous-year questions on Sectional Views

Unit 4: Computer Aided Drafting

- Definition, key concepts and significance of Computer Aided Drafting
- Important diagrams / derivations / algorithms for Computer Aided Drafting
- Solved examples and previous-year questions on Computer Aided Drafting

Unit 5: Assembly Drawings

- Definition, key concepts and significance of Assembly Drawings
- Important diagrams / derivations / algorithms for Assembly Drawings
- Solved examples and previous-year questions on Assembly Drawings

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
