

BACKLOG BUDDY ? STUDY MATERIAL

Engineering Thermodynamics ? Syllabus & Reference Books

Subject Code: ME301 Semester: 3

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: First Law of Thermodynamics

- Definition, key concepts and significance of First Law of Thermodynamics
- Important diagrams / derivations / algorithms for First Law of Thermodynamics
- Solved examples and previous-year questions on First Law of Thermodynamics

Unit 2: Second Law of Thermodynamics

- Definition, key concepts and significance of Second Law of Thermodynamics
- Important diagrams / derivations / algorithms for Second Law of Thermodynamics
- Solved examples and previous-year questions on Second Law of Thermodynamics

Unit 3: Entropy and Availability

- Definition, key concepts and significance of Entropy and Availability
- Important diagrams / derivations / algorithms for Entropy and Availability
- Solved examples and previous-year questions on Entropy and Availability

Unit 4: Pure Substances

- Definition, key concepts and significance of Pure Substances
- Important diagrams / derivations / algorithms for Pure Substances
- Solved examples and previous-year questions on Pure Substances

Unit 5: Ideal Gases and Mixtures

- Definition, key concepts and significance of Ideal Gases and Mixtures
- Important diagrams / derivations / algorithms for Ideal Gases and Mixtures
- Solved examples and previous-year questions on Ideal Gases and Mixtures

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
