

BACKLOG BUDDY ? STUDY MATERIAL

Fluid Mechanics ? Quick Revision & Formula Sheet

Subject Code: ME304 Semester: 4

.....
Last-day revision guide with key definitions, formulas and diagrams checklist.

Unit 1: Fluid Statics

- Definition, key concepts and significance of Fluid Statics
- Important diagrams / derivations / algorithms for Fluid Statics
- Solved examples and previous-year questions on Fluid Statics

Unit 2: Kinematics of Fluid Flow

- Definition, key concepts and significance of Kinematics of Fluid Flow
- Important diagrams / derivations / algorithms for Kinematics of Fluid Flow
- Solved examples and previous-year questions on Kinematics of Fluid Flow

Unit 3: Bernoulli's Equation and Applications

- Definition, key concepts and significance of Bernoulli's Equation and Applications
- Important diagrams / derivations / algorithms for Bernoulli's Equation and Applications
- Solved examples and previous-year questions on Bernoulli's Equation and Applications

Unit 4: Flow Through Pipes

- Definition, key concepts and significance of Flow Through Pipes
- Important diagrams / derivations / algorithms for Flow Through Pipes
- Solved examples and previous-year questions on Flow Through Pipes

Unit 5: Boundary Layer Theory

- Definition, key concepts and significance of Boundary Layer Theory
- Important diagrams / derivations / algorithms for Boundary Layer Theory
- Solved examples and previous-year questions on Boundary Layer Theory

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
