

BACKLOG BUDDY ? STUDY MATERIAL

Theory of Machines ? Syllabus & Reference Books

Subject Code: ME401 Semester: 4

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Mechanisms and Machines

- Definition, key concepts and significance of Mechanisms and Machines
- Important diagrams / derivations / algorithms for Mechanisms and Machines
- Solved examples and previous-year questions on Mechanisms and Machines

Unit 2: Velocity and Acceleration Analysis

- Definition, key concepts and significance of Velocity and Acceleration Analysis
- Important diagrams / derivations / algorithms for Velocity and Acceleration Analysis
- Solved examples and previous-year questions on Velocity and Acceleration Analysis

Unit 3: Cams and Followers

- Definition, key concepts and significance of Cams and Followers
- Important diagrams / derivations / algorithms for Cams and Followers
- Solved examples and previous-year questions on Cams and Followers

Unit 4: Gears and Gear Trains

- Definition, key concepts and significance of Gears and Gear Trains
- Important diagrams / derivations / algorithms for Gears and Gear Trains
- Solved examples and previous-year questions on Gears and Gear Trains

Unit 5: Balancing and Vibration

- Definition, key concepts and significance of Balancing and Vibration
- Important diagrams / derivations / algorithms for Balancing and Vibration
- Solved examples and previous-year questions on Balancing and Vibration

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
