Heat Transfer ? Unit-wise Lecture Notes

Subject Code: ME402 Semester: 4

.....
Condensed notes covering all five units: Conduction Heat Transfer, Convection Heat Transfer, Radiation Heat Transfer, Heat Exchangers, Boiling and Condensation.

Unit 1: Conduction Heat Transfer

- Definition, key concepts and significance of Conduction Heat Transfer
- Important diagrams / derivations / algorithms for Conduction Heat Transfer
- Solved examples and previous-year questions on Conduction Heat Transfer

Unit 2: Convection Heat Transfer

- Definition, key concepts and significance of Convection Heat Transfer
- Important diagrams / derivations / algorithms for Convection Heat Transfer
- Solved examples and previous-year questions on Convection Heat Transfer

Unit 3: Radiation Heat Transfer

- Definition, key concepts and significance of Radiation Heat Transfer
- Important diagrams / derivations / algorithms for Radiation Heat Transfer
- Solved examples and previous-year questions on Radiation Heat Transfer

Unit 4: Heat Exchangers

- Definition, key concepts and significance of Heat Exchangers
- Important diagrams / derivations / algorithms for Heat Exchangers
- Solved examples and previous-year questions on Heat Exchangers

Unit 5: Boiling and Condensation

- Definition, key concepts and significance of Boiling and Condensation
- Important diagrams / derivations / algorithms for Boiling and Condensation
- Solved examples and previous-year questions on Boiling and Condensation

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
