

BACKLOG BUDDY ? STUDY MATERIAL

Turbo Machines ? Syllabus & Reference Books

Subject Code: ME502 Semester: 5

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Energy Transfer in Turbo Machines

- Definition, key concepts and significance of Energy Transfer in Turbo Machines
- Important diagrams / derivations / algorithms for Energy Transfer in Turbo Machines
- Solved examples and previous-year questions on Energy Transfer in Turbo Machines

Unit 2: Steam Turbines

- Definition, key concepts and significance of Steam Turbines
- Important diagrams / derivations / algorithms for Steam Turbines
- Solved examples and previous-year questions on Steam Turbines

Unit 3: Hydraulic Turbines

- Definition, key concepts and significance of Hydraulic Turbines
- Important diagrams / derivations / algorithms for Hydraulic Turbines
- Solved examples and previous-year questions on Hydraulic Turbines

Unit 4: Centrifugal Compressors

- Definition, key concepts and significance of Centrifugal Compressors
- Important diagrams / derivations / algorithms for Centrifugal Compressors
- Solved examples and previous-year questions on Centrifugal Compressors

Unit 5: Gas Turbines

- Definition, key concepts and significance of Gas Turbines
- Important diagrams / derivations / algorithms for Gas Turbines
- Solved examples and previous-year questions on Gas Turbines

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.
