

BACKLOG BUDDY ? STUDY MATERIAL

CAD/CAM and Automation ? Syllabus & Reference Books

Subject Code: ME602 Semester: 6

.....
Unit-wise syllabus, recommended reference books and question paper pattern.

Unit 1: Geometric Modeling

- Definition, key concepts and significance of Geometric Modeling
- Important diagrams / derivations / algorithms for Geometric Modeling
- Solved examples and previous-year questions on Geometric Modeling

Unit 2: Finite Element Analysis Basics

- Definition, key concepts and significance of Finite Element Analysis Basics
- Important diagrams / derivations / algorithms for Finite Element Analysis Basics
- Solved examples and previous-year questions on Finite Element Analysis Basics

Unit 3: CNC Programming

- Definition, key concepts and significance of CNC Programming
- Important diagrams / derivations / algorithms for CNC Programming
- Solved examples and previous-year questions on CNC Programming

Unit 4: Computer Aided Manufacturing

- Definition, key concepts and significance of Computer Aided Manufacturing
- Important diagrams / derivations / algorithms for Computer Aided Manufacturing
- Solved examples and previous-year questions on Computer Aided Manufacturing

Unit 5: Industrial Robotics

- Definition, key concepts and significance of Industrial Robotics
- Important diagrams / derivations / algorithms for Industrial Robotics
- Solved examples and previous-year questions on Industrial Robotics

Exam Tips:

- * Start with the latest syllabus and exam pattern ? focus on units with the highest weightage first.
- * Solve at least 3 previous year papers under timed conditions before the exam.
- * Focus on frequently repeated topics ? they are strong preparation priorities based on available papers (not guarantees).
- * Revise definitions, diagrams and standard derivations ? they earn easy marks.
- * Practise numerical problems from every unit; papers usually include 2-3 compulsory problems.

Disclaimer: Sample study material for preparation support only.

Appearance counts are based on available papers and are not exam predictions.
