

Sample End Semester Question Paper - 2025

Subject: Design of RC Structures | Code: CE401 | Semester: 4

Branch: Civil | Regulation: R20 (sample) | Time: 3 Hours | Max Marks:

This is a SAMPLE question paper generated for Backlog Buddy (demo/testing data).
It is not an official university paper and is provided to demonstrate the platform.

PART A - Short questions (10 x 1 = 10 Marks)

1. State one limit state.
2. What is development length?
3. Define effective cover.
4. What is D-steel?
5. State one minimum steel requirement.
6. What is the working stress method?
7. Define characteristic strength.
8. What is a singly reinforced beam?
9. Define an isolated footing.
10. What is a two-way slab?

PART B - Long questions (6 x 13 = 78 Marks)

1. Explain the working stress method of RCC design with an example.
2. Design a singly reinforced beam by the limit state method.
3. Explain the design of one-way slabs.
4. Explain the design of isolated footings.
5. Explain two-way slabs: load distribution and design.
6. Explain minimum steel requirements and reinforcement detailing in RCC.
