

Sample End Semester Question Paper - 2026

Subject: Python Programming | Code: CS201 | Semester: 2

Branch: CSE | Regulation: R20 (sample) | Time: 3 Hours | Max Marks:

This is a SAMPLE question paper generated for Backlog Buddy (demo/testing data).
It is not an official university paper and is provided to demonstrate the platform.

PART A - Short questions (10 x 1 = 10 Marks)

1. What is a dictionary?
2. What does try-except do?
3. What is the `__init__` method?
4. Name one built-in string method used for searching.
5. Name two features that make Python popular.
6. State two mutable data types in Python.
7. What is a lambda function?
8. How are mutable objects passed to functions in Python?
9. What does the `len()` function do?
10. State the difference between a list and a tuple.

PART B - Long questions (10 x 8 = 80 Marks)

1. Explain sets and tuples and their operations with examples.
2. Explain Python data types, variables and operators. Write a program using them.
3. Explain functions in Python: arguments, return values, scope and lambda functions with examples.
4. Explain lists: creation, operations and list comprehensions with programs.
5. Explain dictionaries and file handling in Python with example programs.
6. Explain exception handling in Python with examples.
7. Explain OOP in Python: classes, objects, inheritance, encapsulation and polymorphism with a program.
8. Explain strings and string methods with examples.
9. Explain modules and packages. Demonstrate with a small project structure.
10. Write recursive programs: factorial, Fibonacci and Tower of Hanoi.
