

Sample End Semester Question Paper - 2025

Subject: Engineering Thermodynamics | Code: ME201 | Semester: 2

Branch: Mechanical | Regulation: R20 (sample) | Time: 3 Hours | Max I

This is a SAMPLE question paper generated for Backlog Buddy (demo/testing data).
It is not an official university paper and is provided to demonstrate the platform.

PART A - Short questions (10 x 1 = 10 Marks)

1. State the zeroth law of thermodynamics.
2. Define a closed system.
3. What is a heat engine?
4. Define enthalpy.
5. State one use of steam tables.
6. Define a thermodynamic system.
7. State the first law of thermodynamics.
8. What is entropy?
9. Define a Carnot engine.
10. What is a quasi-static process?

PART B - Long questions (6 x 13 = 78 Marks)

1. State the first law of thermodynamics. Apply it to closed and open systems.
2. Explain the second law of thermodynamics and entropy.
3. Find the efficiency of a Carnot engine. Solve a numerical.
4. Explain properties of water and steam. Read steam tables.
5. Compare Otto, Diesel and dual cycles with P-V diagrams.
6. Explain work and heat transfer in quasi-static processes.
