

Backlog Buddy

Demonstration question paper generated from available previous papers - for practice only

B.Tech. I Semester Examination, 2024

Regulation: R20 | University: JNTUK

Engineering Thermodynamics (21ME32)

Time: 3 hours Max. Marks: 60

Answer one question from each unit. All questions carry equal marks.

UNIT - 1 [Basic Concepts & Zeroth Law]

- a) Distinguish between closed, open and isolated systems with examples.
- b) Explain the zeroth law of thermodynamics and its applications.

UNIT - 2 [First Law of Thermodynamics]

- a) Derive the steady flow energy equation and apply it to a nozzle.
- b) Derive the steady flow energy equation and apply it to a nozzle.

UNIT - 3 [Second Law, Entropy & Availability]

- a) Explain the equivalence of Kelvin Planck and Clausius statements.
- b) Prove that the entropy of the universe always increases.

UNIT - 4 [Properties of Pure Substances & Gas Mixtures]

- a) Explain the Mollier chart and its engineering uses.
- b) Explain the Mollier chart and its engineering uses.

UNIT - 5 [Vapour & Gas Power Cycles]

- a) Compare Otto and Diesel cycles with p-v and T-s diagrams.
- b) Explain the Rankine cycle with a T-s diagram.

Backlog Buddy - previous question paper library. This paper is reconstructed from previous examination papers available on the platform and is intended for practice only.
